DUNE SOFA BED

Build your Sofa Bed in 6 easy steps

What's in the box?

1

Attach the Back Foam Cushion (B) to the Back Frame (D) with 8 velcro tapes. Take out the Back Foam Cushion Cover (F) and put the cover on.

*****Pls note that the cover has a back and front. The front cover has two holes to fit the two metal brackets.**

2

Take out the Seat Foam Cushion (A) and put on the Seat Foam Cushion Cover (E). It's best the internal cover zip edge is facing towards the back and away from the upper upholstery edge.

3

Pull out the metal seat frame and on the shorter sides along the edge underneath, tear off the protective transit fabric strips starting from the middle and working your way out. Attach the Seat Foam Cushion to the Seat Frame/Storage (C) with the velcro strip and the 3 velcro tapes at the back.

4

Attach the back onto the seat, then slide the 2 Arms (J) on to the seat frame. Use the two Star Handle Locking Screws (K) to lock the back onto the seat frame where the black metal bracket is on the inside of the storage area.

5

Insert the 2 Back Rest Cushion insert (G) in their covers. Place the larger cushions (G) on the Back Rest and the smaller cushions (H) on side.

Warning: Do not stand on the storage area.

6

Pull or push the seat when switching to bed or sofa mode. Do not lift the seat.

Push down the back rest to complete the sofa to bed transformation.
